SUMMARY

MBA candidate in Operations and Business Analytics with experience in Project Management and Supply Chain Management, focusing on delivery performance and process improvement. Skilled in data analysis, financial modelling, and tools like Excel and Tableau. Certified in operations, risk modelling, and decision-making. Strong in problem-solving, critical thinking, and cross-functional collaboration.

EDUCATION

MBA (Operations and Business Analytics)	Dayananda Sagar College of Engineering, Bangalore.	2023-2025
Bachelor Of Science	KLE's JT College, Gadag.	2020-2023
Class XII	KLE's JT College, Gadag.	2020
Class X	N S Hugar School, Annigeri.	2018

EXPERIENCE

Assistant Project Manager | Spacez | Bengaluru (Jun 2025- Present)

- Support end-to-end project management for luxury villa setups, overseeing all phases from planning to successful handover.
- Managed and Built Systems for tracking Inventory and automated the system for reducing stockout and overstocking.
- Built and maintained KPI dashboards tracking transaction accuracy, processing time, compliance rate, and financial impact using Excel.
- Collaborate with vendors, contractors, and suppliers to manage resources, materials, and on-site operations efficiently.
- Built Procurement systems, SOP's, and built a finance tracker for project budget planning and resource allocation.
- Analyzed budget vs actual spend across operations, identifying cost overruns, savings opportunities, and variance trends to support management decision-making.
- Automated and standardized data collection and reporting workflows, improving reporting accuracy and turnaround time.

Intern – Senior Supply Executive | Flipkart | Bengaluru (Jan 2025 – Mar 2025)

- Led and contributed to two major projects—"Breach Reduction / Reliability Improvement" and "Spillover Reduction"—delivering measurable improvements in order fulfilment accuracy and breach reduction.
- Conducted end-to-end process analysis and performed data-driven investigations to identify recurring patterns and systemic inefficiencies impacting reliability.
- Implemented targeted process improvements and action plans, directly contributing to reduced breaches and stronger alignment with organizational KPIs.
- Designed and maintained performance dashboards to track progress, enabling proactive interventions and more responsive decision-making.

PROJECTS

Lean Six Sigma (2025)

Evaluated systems And Implemented Changes to Reduce Process flows a complete System of supply chain. Also built in SLA for Increased Efficiency And delivered ratings of 4.9 from 3.9

Inventory Optimisation and Cost Reduction (2024)

Designed and implemented an Excel-based simulation model to analyse inventory policies and reduce total inventory costs. Applied the Economic Order Quantity (EOQ) model to balance ordering and holding costs. Used what-if analysis to assess demand variability and supplier lead times. Created dashboards with Pivot Tables and Charts to visualize trends and cost breakdowns.

Tools: Microsoft Excel (Solver, Pivot Tables, Charts, What-if Analysis)

SKILLS

Technical Skills	Functional Skills	Soft Skills & Awareness
MS Excel	Analytical Problem Solving	Critical Thinking
Power Bi	Project Valuation	Communication
pyton	Supply chain Analysis	Leadership
SQL	Risk Evaluation	Decision-Making
