PROFESSIONAL SUMMARY

Flutter Full Stack Developer with 1.5+ years of experience in building and maintaining production-ready mobile applications. Currently working at Vealthx, contributing across the full application lifecycle including development, backend integration, testing, release, and post-production support. Experienced in Play Store and App Store publishing, Flutter (flutter_bloc), Node.js backend integration, Firebase push notifications, and production issue handling. Strong problem-solving mindset with a focus on scalable and reliable mobile solutions.

PROFESSIONAL EXPERIENCE

Flutter App Developer

Vealthx (Fintech Application)

2025 Aug – Present
Bengaluru,karanataka

- Solely handled end-to-end mobile app lifecycle, from app registration and configuration to successful publishing on Play Store and App Store
- Managed Play Console and App Store Connect, including certificates, provisioning profiles, signing, compliance, and release submissions
- Implemented state management using flutter_bloc for scalable and maintainable architecture
- Managed release testing, generated testing APK / IPA, and distributed builds to QC using App Distribution

Mobile App Developer

DSM Soft Pvt Ltd (Tracking Applications)

2024 Aug – 2025 Sep
Trichy , Tamil Nadu

- Developed the Flutter SR Portal application **from scratch**, handling **end-to-end frontend development**
- Developed **Communication processor** between Server and Tracking Device using Node.js Socket
- Improved performance and reliability of real-time tracking features in FMS Lite App
- Used **Riverpod** for efficient and maintainable state management in SR portal
- Integrated REST APIs using the **Dio** package
- Implemented **vehicle trail route visualization**

Projects

Vealthx App - App Link

Flutter Fintech Application (iOS & Android)

- Restructured the application using **BLoC architecture**, improving scalability, maintainability, and state management
- Handled **end-to-end Play Store and App Store registration and publishing**, including certificates, signing, and release submissions
- Actively developed and maintained both **Android and iOS versions** using **Android Studio** and **Xcode**
- Worked on core application modules, including:
    - **DigiLocker integration (**full-stack : Flutter frontend + Node.js backend)
    - **Zoho subscription integration** (full-stack: Flutter frontend + Node.js backend)

SR Portal App - App Link

Flutter Field Technician Application (Android)

- Developed the application **from scratch**, handling **end-to-end frontend development**
- Integrated REST APIs using the **Dio** package for reliable network communication
- Used **Riverpod** for efficient and maintainable state management
- **Integrated Rive animations to enhance user experience and interaction**
- Implemented a complete **attendance management system** for field technicians

---

FMS Lite App - App Link

React Native Vehicle Tracking Application (Android and IOS)

- Supported and maintained a **production-level vehicle tracking application**
- Implemented **vehicle trail route visualization** for tracking historical movement
- Worked with **real-time GPS data** to improve tracking accuracy and reliability
- **Optimized performance for map rendering and continuous location updates**

TECHNICAL SKILLS

Flutter & Dart	**React js**	**Python**	**Git Control**
Django	**Firebase**	**PostgreSQL**	**Node JS**

CERTIFICATION / TRAINING

Python Full Stack Development

Rajalakshmi Eduverse

- Hands-on experience in **Frontend and Backend Development**
- Strong expertise in **Django Web Framework**
- Built secure and scalable web applications using real-world practices
