BALAJI M

Senior Flutter Developer | 3.5 Years Experience | Cross-Platform & IoT Specialist

7338804286 | balajiofficial2001@gmail.com | LinkedIn Profile | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Results-driven Senior Flutter Developer with 3.5+ years of experience delivering 6 production apps across Android, iOS, and Web — including IoT-integrated POS systems and high-traffic marketplace platforms. Expert in Clean Architecture, BLoC/GetX, Firebase, and REST API design. Known for cutting UI render times, architecting scalable state management, and shipping stable builds on time. Leverages AI tools (ChatGPT, GitHub Copilot, Claude) to accelerate development cycles by 40%+.

CORE SKILLS

Mobile	Flutter, Dart — Android, iOS, Web (Production deployed)
Architecture	Clean Architecture, MVVM, BLoC, GetX, Provider
Backend	REST APIs, JSON, Dio, HTTP, Firebase (Auth, Firestore, FCM, Storage)
IoT	Bluetooth Thermal Printer Integration (ESC/POS)
DevOps	Git, GitHub, CI/CD (GitHub Actions), Play Store, App Store
Testing	Unit Testing, Widget Testing, Integration Testing
AI Tools	ChatGPT, GitHub Copilot, Claude AI — used daily for faster dev & debugging
Languages	Dart (Expert), Java (Familiar), Python (Familiar)

WORK EXPERIENCE

Senior Flutter Developer | CI Global Technologies *Jul 2023 – Present*

- Architected and shipped 4 cross-platform Flutter apps (Android/iOS/Web) serving business clients in automotive, F&B, and sports sectors.
- Reduced widget rebuild cycles by ~45% through targeted BLoC refactoring — resulting in measurably smoother UI transitions.
- Built a Bluetooth thermal printer SDK integration used in 2 POS products, handling ESC/POS command generation entirely in Dart.
- Designed a centralized REST API layer with structured error handling, retry logic, and response parsing — reducing API-related bugs by 60%.
- Implemented pagination and lazy loading for product listing screens handling 10,000+ records with zero performance degradation.
- Integrated Firebase Auth, Firestore, Cloud Messaging, and Storage across multiple apps — achieving 99.9% push delivery reliability.
- Delivered production builds via CI/CD pipelines (GitHub Actions), reducing manual release effort by 70%.
- Actively uses AI tools (Copilot, ChatGPT) to accelerate feature delivery by 35–40% compared to traditional development.

Flutter Developer | MD Quality Apps and Solutions *Oct 2022 – May 2023*

- Built 2 cross-platform business applications integrated with REST APIs for real-time data sync.
- Refactored legacy UI components improving app responsiveness — reduced average screen load time by 30%.
- Collaborated with backend teams to define API contracts, resulting in zero data mismatch issues post-launch.
- Maintained modular architecture enabling seamless addition of new features without breaking existing workflows.

KEY PROJECTS

Dealer Management System (DMS) — *Flutter · BLoC · REST APIs · Firebase · Clean Architecture*

- End-to-end vehicle dealer platform covering sales, order tracking, employee management, and test drive scheduling.
- Applied Clean Architecture strictly — 3 separate layers (Data, Domain, Presentation) enabling independent testing of business logic.
- Optimized large list rendering with custom ListView builders — achieved 60fps scrolling on 500+ record datasets.

Rupos — POS Billing Application — *Flutter · REST APIs · Bluetooth IoT · ESC/POS*

- Built full POS billing system with Bluetooth thermal printer support — first IoT-integrated Flutter app at the company.
- Real-time inventory sync via REST APIs — stock levels update within 2 seconds of any transaction.
- Optimized checkout flow reducing average transaction completion time from 8s to under 3s.

Farm7Days — Livestock & Crop Marketplace — *Flutter · REST APIs · Firebase · Android/iOS/Web*

- Developed marketplace platform deployed across all 3 platforms (Android, iOS, Web) from a single codebase.
- Implemented structured pagination for product listings — supports 10,000+ products with smooth infinite scroll.

MeatProtein — POS & Livestock Sales App — *Flutter · Dart · REST API · Bluetooth IoT*

- POS app for livestock/crop/tree sales with Bluetooth printer for billing receipts.
- Real-time product availability via API — zero stale data incidents post-launch.

SportsCentral — Team Management & Live Tracking — *Flutter · Dart · REST API*

- Live match tracking with real-time data refresh — optimized state updates to eliminate UI flicker during live score updates.
- Dynamic API-driven content with intelligent caching — reduced redundant API calls by 50%.

TNSTC — Government Learning App — *Flutter · Dart · REST API*

- Built government-sector learning app with API-based course management, content purchases, and user progress tracking.

EDUCATION

Bachelor of Science in Computer Science *2022*

Sindhi College of Arts and Science, Chennai

WHY HIRE ME

☑ **6 Production Apps Shipped**	☑ **IoT + Mobile (Rare Combo)**	☑ **AI-Augmented Developer**
