DEV KALRA

Hyderabad, Telangana
+91 9034906032 Kalradev50@gmail.com

Overview

Mobile Engineer specializing in Flutter/Dart with experience developing secure, reliable, and multi-platform mobile applications across Android, iOS, Web, and Desktop. Strong focus on Clean Architecture, quality-driven development, and long-term maintainability.

Education

Maharishi Markandeshwar University **Aug 2019 – July 2023**
B. Tech in Computer Science *CGPA– 8.89*

Swami Vivekanand Public School **March 2018 – April 2019**
Senior Secondary *Percentage – 74*

Technical Skills

Languages: Dart, SQL, Python
Frameworks: Flutter SDK
Tools: Android Studio, VS Code, GitHub
Backend & Tools: Rest API's, WebSocket's
Cloud Technologies: Firebase, AWS, GCP
Architecture: Clean Architecture, MVVM, Provider, Riverpod, BLoC (Basic)

Experience

HLP Innovation – SDE (Flutter Developer) **June 2025 – Present**
Hyderabad, INDIA

- Leading end-to-end development of cross-platform applications using Flutter for enterprise and healthcare-adjacent platforms.
- Implementing **Clean Architecture** and modular design to ensure maintainability, testability, and high-quality code.
- Handling API integration, debugging, performance improvements, and deployment workflows.
- Managing Git branching, code reviews, and development standards across the team.

Virtuoso NetSoft - SDE (Flutter Developer) **January 2025 – June 2025**
Chandigarh, INDIA

- Developed **real-time features** using WebSocket's, improving responsiveness and communication efficiency.
- Built reusable UI components and screens consistent with Figma designs and accessibility guidelines.
- Optimized API performance and improved data-handling reliability in collaboration with backend engineers.

Etraffic Webexpert - SDE (Intern) **April 2024 – December 2024**
Yamuna Nagar, INDIA

- Built multi-platform Flutter UI components for Android and iOS applications.
- Supported product testing, documentation, bug fixing, and cross-team communication

Certificates

- The Complete **Flutter Development Bootcamp with Dart by – Dr. Angela Yu (2023)**
- Introduction to **Cybersecurity by Cisco Networking Academy – (2024)**
- The **Salesforce Platform Basics – Trailhead (Salesforce) – (2024)**

Projects

HLP App – Live Project (Medical Healthcare Platform)

Mobile Engineer | Flutter, Dart

- Developed a multi-platform medical healthcare application enabling users to book doctor appointments, manage consultations, and access healthcare services seamlessly across Web, Desktop, and Mobile.
- Integrated secure backend APIs for patient data, doctor availability, authentication, and appointment management.
- Improved UI/UX by implementing responsive layouts, clean visual hierarchy, and accessible design, resulting in a user-friendly medical interface.

User-Agent Chat System (P2A Brand–Consumer Communication Application)

Mobile Engineer | Flutter, Dart

- Developed a **real-time chat communication platform** designed for brands to directly interact with consumers who show interest in their services.
- Implemented ***WebSocket's and Apache Kafka*** to support instant messaging, event streaming, and high throughput between users and brand agents.

Safe Lane – Course Project

Mobile Engineer | Flutter, Dart

- Developed a cross-platform mobile application designed to identify and report road hazards such as potholes, open manholes, and unsafe areas.
- Integrated Firebase & Cloud Functions to store hazard reports, manage user data, and enable real-time data synchronization.
- Used ***Google Maps API*** and Directions API to visualize hazard locations, display map markers, and provide navigation assistance to users.
