🎯 Professional Summary

Dynamic and results-oriented engineer with over two years of experience in Supplier Quality Assurance and Production Planning & Control (PPC). Demonstrated expertise in enhancing supplier quality, optimizing production workflows, and managing inventory to meet quality and delivery targets. Proficient in SAP systems, shop floor control, and process improvement, with a proven ability to coordinate cross-functional teams and drive operational efficiency.

🏢 Professional Experience

Production Planning and Control Engineer

Maxwell Energy Systems Pvt. Ltd., Aurangabad (A part of endurance technology)

Apr 2024 – Present

- Developed and managed daily and weekly production schedules aligned with customer demand and delivery commitments.
- Monitored production progress, collaborating with management to resolve delays and disruptions promptly.
- Optimized machine and manpower utilization through effective routing and loading plans.
- Maintained accurate inventory levels using real-time stock tracking and Material Requirement Planning (MRP).
- Coordinated with procurement, quality, and sales teams to ensure seamless operations and timely deliveries.
- Generated daily, weekly, and monthly KPI reports to track performance and propose workflow enhancements.
- Analyzed machine logs to identify bottlenecks, implementing adjustments that improved Overall Equipment Effectiveness (OEE) by 10%.
- Streamlined Bill of Materials (BOM) updates, reducing work order errors by 15%.

Supplier Quality Engineer

Maxwell Energy Systems Pvt. Ltd., Aurangabad (A part of endurance technology)

Apr 2023 – Apr 2024

- Inspected incoming materials and components to ensure compliance with specifications.
- Collaborated with suppliers to resolve quality issues using 8D methodology and root cause analysis tools.
- Managed documentation for Supplier Corrective Action Requests (SCARs), Production Part Approval Process (PPAP), and quality audits.
- Conducted supplier evaluations and implemented improvement plans based on performance metrics.

Industrial Production Engineer

Nestlé India Private Limited, Nanjangud, Mysore | Jan 2022 – Jan 2023

- Extracted and analyzed stoppage data from SAP, focusing on Asset Intensity (AI), Production Scheduling (PS), and eUPS.
- Executed tagging procedures, 5S activities, MTBF updates, and SAP vs. log sheet reconciliation.
- Contributed to Autonomous Maintenance (AM) step-change initiatives for coffee and noodle production lines.
- Developed safety maps, One-Point Lessons (OPLs), defect ID cards, Visual Loss Maps (VLMs), and Lockout-Tagout (LOTO) procedures.
- Led factory improvement projects as part of the Performance Acceleration Team, utilizing Total Productive Maintenance (TPM) tools, conducting daily Visual Performance Management (VPM), and applying Fishbone and 5 Whys techniques for root cause analysis.

Internship

BEML Limited, Mysore | 2020

- Gained hands-on experience across multiple departments, including Production Shop, Quality Engineering (Machine Shop, Major Assembly, Light Assembly, Plate & Fabrication, Final Testing, Float Engines), R&D, Planning, Accounts, Marketing, Tool Engineering, Stores, Progress, Purchase, and Shipping within the Equipment and Engine Division.

🎓 Education

B.E. in Industrial and Production Engineering
National Institute of Engineering (NIE), Mysore | 2021

🔍 Technical Projects & Achievements

- Reduced production delays by 20% through enhanced planning and communication workflows.
- Decreased supplier defects from 5% to 0.2% using structured problem-solving and supplier training.
- Implemented a Kanban system for a key product line, reducing Work-in-Progress (WIP) inventory by 15%.

🛠 Technical Skills

- **Production Management:** Production Planning & Scheduling, Shop Floor Management, Material Requirement Planning (MRP), Inventory Control, Process Optimization, Dispatching & Routing, Capacity Planning, Cross-Department Coordination
- **Quality Management:** Supplier Quality Management, Root Cause Analysis (8D, 5 Whys, Fishbone), PPAP, APQP, FMEA
- **Tools & Software:** SAP (ERP), MS Excel (Advanced Reporting), KPI Tracking
- **Methodologies:** Total Productive Maintenance (TPM), 5S, Kanban, Lean Manufacturing
