EXECUTIVE SUMMARY

Project-focused IT professional with formal training in PMBOK and Agile methodologies and a strong foundation in enterprise technology environments; brings hands-on experience **coordinating cross-functional delivery, governance, and stakeholder engagement** across structured initiatives; recognized for **structuring complex work streams into disciplined execution** aligned with business and delivery priorities.

CAREER HIGHLIGHTS

- **Project-trained professional (PMBOK & Agile)** with proven experience supporting IT transformations, system rollouts, and service transitions by managing scope, timelines, risks, and cross-functional stakeholders to deliver stable, business-aligned outcomes
- **Process optimization champion** who designed and implemented standardized SOPs and training frameworks, improving operational efficiency by 28% and enabling scalable, repeatable service delivery models
- **People and performance leader** with a capability to train, mentor, and supervise multi-disciplinary teams, drive accountability, manage escalations, and elevate productivity across technical and operational functions
- **Trusted stakeholder and client partner** recognized for bridging technical complexity with business priorities through clear communication, governance-driven decision-making, and collaboration with engineering, security, vendors, and leadership teams
- **Enterprise IT Operations & Service Delivery Leader** with **10+ years** of experience managing complex hybrid environments, driving ITIL-aligned incident, problem, and change governance while ensuring SLA adherence across mission-critical systems
- **Commercially astute technologist** combining IT operations expertise with consultative sales experience, consistently aligning solutions to customer needs and achieving 115% of sales targets, reinforcing a strong business-outcome mindset

CORE COMPETENCIES

Project Mgmt. Fundamentals	Project Planning & Execution	Agile & Scrum Frameworks	Risk & Issue Management
Stakeholder Coordination	Cross-Functional Collaboration	Resource & Capacity Planning	Budget & Cost Awareness
Vendor Coordination	Change & Transition Management	Milestone Tracking & Delivery Control	Process Improvement & Governance

EDUCATION & CREDENTIALS

2023
Ontario, Canada
Postgraduate Certificate – Project Management
Cambrian College of Applied Arts & Technology

2010-2013
Bengaluru, India
Bachelor's Degree in Computer Science
St. Joseph's University

TECHNICAL SKILLS

- **Project Planning & Scheduling**: MS Project, WBS, Gantt charts, milestone and dependency tracking
- **Agile Delivery Tools**: JIRA, Scrum boards, sprint planning and tracking
- **Governance & Control**: Risk and issue logs, change control workflows, delivery tracking
- **Reporting & Documentation**: Project dashboards, status reporting, project documentation tools
- **Stakeholder Systems**: Salesforce CRM

PROFESSIONAL EXPERIENCE

Jun'23-Jun'25
Sudbury, ON, Canada

Operations & Delivery Team Lead (Retail Operations)
Giant Tiger

- Led execution of operational and delivery initiatives across store functions, coordinating 8–10 cross-functional resources to ensure timely delivery and uninterrupted operations
- Owned workforce planning, task allocation, and execution tracking, improving resource utilization, delivery consistency, and operational readiness
- Governed inventory, replenishment, and stock movement initiatives, minimizing supply disruptions and ensuring continuity across departments
- Drove customer escalation resolution, service recovery, and compliance rollouts (safety, visual merchandising, audits), strengthening service outcomes and governance adherence
- Tracked and analyzed sales, staffing, and merchandising metrics, enabling data-driven decision-making by store leadership
- Acted as the primary delivery coordination point between leadership and frontline teams, ensuring clarity of objectives, accountability, and cross-functional alignment

Aug'14-Mar'23
Bengaluru, India

Senior Technical Support Representative
Hewlett Packard

- Led cross-functional IT service delivery initiatives across enterprise environments, aligning infrastructure, security, support, and customer teams to deliver SLA-governed outcomes
- Improved service delivery efficiency by 28% by standardizing SOPs, escalation models, and incident workflows aligned with ITIL practices
- Owned high-priority escalations end-to-end, acting as single point of accountability across technical teams, vendors, and stakeholders to ensure timely resolution
- Spearheaded governance, audit support, and continuous improvement initiatives, coordinating remediation actions and team enablement to improve turnaround time, service readiness, and first-contact resolution
- Managed customer-facing technical delivery across digital channels, balancing technical accuracy, stakeholder communication, and brand impact
- Partnered with product, engineering, and vendors to convert recurring issues into system and service improvements
- Delivered revenue-linked solution engagements, supporting consultative sales, demos, and post-sales execution to achieve 115% of assigned targets
