□ Content Pipeline Strategy

Kinetic Technology Showcase & Social Media Strategy Meeting

□ Saturday, 21 Feb 2026 | □ 11:23 AM IST | □ 45 minutes

□ Virtual Meeting

□ Attendees

Ravi Kumar, Pradeep Zille, Avijit Sinha, Manjunath B, Nikhitha A, Akshay Singh

□ Executive Summary

Meeting focused on establishing a content pipeline to showcase Craftech360's kinetic technology concepts on LinkedIn and social media. The goal is to shift from post-event content to pre-event concept showcasing, positioning the team as industry experts.

□ Primary Goal

Showcase kinetic concepts on LinkedIn to build credibility and expertise

□ Posting Cadence

3 renders per week starting Monday (Tue/Thu best for LinkedIn)

□ Shift in Focus

□ Content Quality

From post-event documentation to pre-event concept showcasing

Better storytelling, cinematic camera work, realistic speeds

□ Content Pipeline Workflow

The complete flow from idea to social media post:

□

IDEA

BD Team

↓

□

3D CONCEPT

Manjunath

↓

□

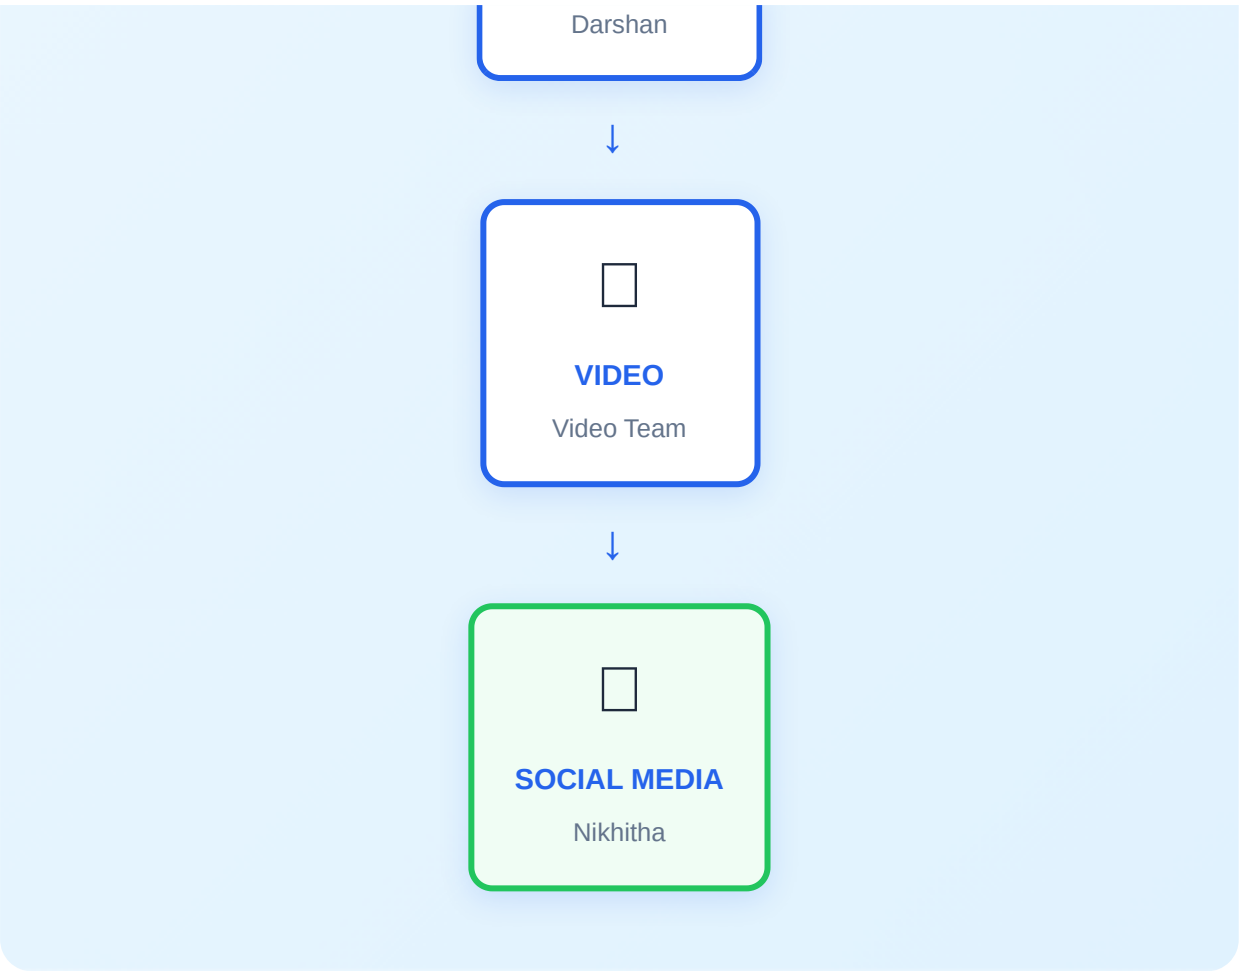
TECH CHECK

Harsh

↓

□

MECHANICAL



Workflow Details:

Step 1 - Ideas: BD team submits concepts, references, and inspirations to a shared "Idea Sheet"

Step 2 - 3D Concept: Manjunath creates 3D mockups in Blender/Unreal with multiple iterations

Step 3 - Tech Feasibility: Harsh reviews technical possibilities and challenges

Step 4 - Mechanical Check: Darshan verifies mechanical structure and durability

Step 5 - Video Production: Final render with proper content, camera angles, and storytelling

Step 6 - Social Media: Nikhitha schedules and posts on LinkedIn (BD watermarks before sharing)

□ 3D Render Standards

1920×1080 Resolution Standard	**Real-time** Animation Speed
Cinematic Camera Movement	**Textured** Backgrounds

Quality Improvements Required:

- **Storytelling:** Develop storylines and storyboards for each render
- **Camera Work:** Apple-style close-up shots, reveal sequences, surprise elements
- **Animation Speed:** Match actual real-time movement (reduce current speed by ~50%)
- **Backgrounds:** Use textured environments instead of plain walls
- **Content:** Show real use cases with rich, meaningful visuals
- **Product Focus:** Keep product visuals clean, avoid flashy distracting backgrounds

□ Key Decisions Made

- Start posting kinetic concepts on LinkedIn immediately - don't wait for perfection
- Create "Render Dashboard" Excel sheet with all existing projects
- Create "Idea Sheet" for BD team to submit new concepts

- Target 3 posts per week starting Monday (best days: Tuesday & Thursday)
- All team members should repost/engage with content for maximum reach
- Use AI tools (ChatGPT, Gemini) for copywriting - don't wait for manual captions
- BD team has existing presentations with descriptions - modify and use
- Consider external creative agency partnership for content direction (test with Kestone contact)
- Focus on structural/architectural integration ideas (wall fascia, stage backdrops)
- Create use-case specific renders (R&R events, launches, exhibitions)

☐ Action Items

☐ Manjunath B

- ☐ Share Excel sheet with all current/past project renders
- ☐ Complete at least ONE render TODAY for Monday posting
- ☐ Develop storylines and storyboards for renders
- ☐ Adjust animations to realistic real-time speeds
- ☐ Create multiple iterations of Try Block (portrait, tunnel styles)
- ☐ Use textured backgrounds instead of plain walls

☐ Ravi Kumar

- ☐ Get team access to Google Gemini (via Abhilash)
- ☐ Ensure BD team watermarks videos before client sharing
- ☐ Oversee rapid market release of renders

- ☐ Add Apple-style cinematic camera movements

☐ Avijit Sinha

- ☐ Provide content references for 3D renders
- ☐ Brainstorm 4-5 solid ideas for rendering
- ☐ Check feasibility before passing to Manjunath
- ☐ Drive the project and content calendar

☐ Nikhitha A

- ☐ Plan and schedule LinkedIn content postings
- ☐ Coordinate with Manjunath on content requirements
- ☐ Use existing Craftech360 content for posts

☐ Akshay Singh

- ☐ Provide visual input and references
- ☐ Contribute event-specific use case ideas

☐ BD Team (All)

- ☐ Submit ideas to "Idea Sheet"
- ☐ Repost and engage with LinkedIn content
- ☐ Watermark videos before sharing with clients
- ☐ Use AI tools for caption writing

☐ Products to Feature in Renders

HMRS
Horizontal Movement Rotating Screens

DNA Display
Multi-layer Kinetic LED

Try Block
Stage Backdrop Unveils

Aurora Fascia
Architectural Integration

Flying Screens
Suspended LED Displays

Matrix Screens
Grid of Synced Monitors

□ Immediate Timeline

Today (Sat, 21 Feb)

Manjunath completes 1 render

At least one polished render ready for Monday posting

Monday, 24 Feb

First LinkedIn Post

Launch content pipeline with first kinetic concept post

Ongoing

3 Posts Per Week

Target: Tuesday and Thursday for best LinkedIn visibility

May 2026

Waves Event

Next big event opportunity - content should be ready

□ Key Quote from Ravi

> *"When you post a concept, it will put you on an expertise seat. It'll put you on a different space in the client's mind. Rather than posting a*

> *video after the event - that's done and dusted. Start putting the concepts, from idea to prototype to MVP to execution. I've connected all the dots - please don't make me remind you again."*
